1. Instruction for an ETH-wallet creating and Playkey ICO participating

1.1. Create Ethereum-wallet

In order to participate in the Playkey ICO, you must have an Ethereum-wallet. If you do not have such wallet, we recommend creating it using the MyEtherWallet service.

If you have an existing MyEtherWallet account, please jump to the next section «[View the Ethereum-wallet info](#)».

Please note that cryptocurrency exchange account is not suitable for purchasing PKT. You need to have a full Ethereum/Bitcoin wallet, not a trading account.

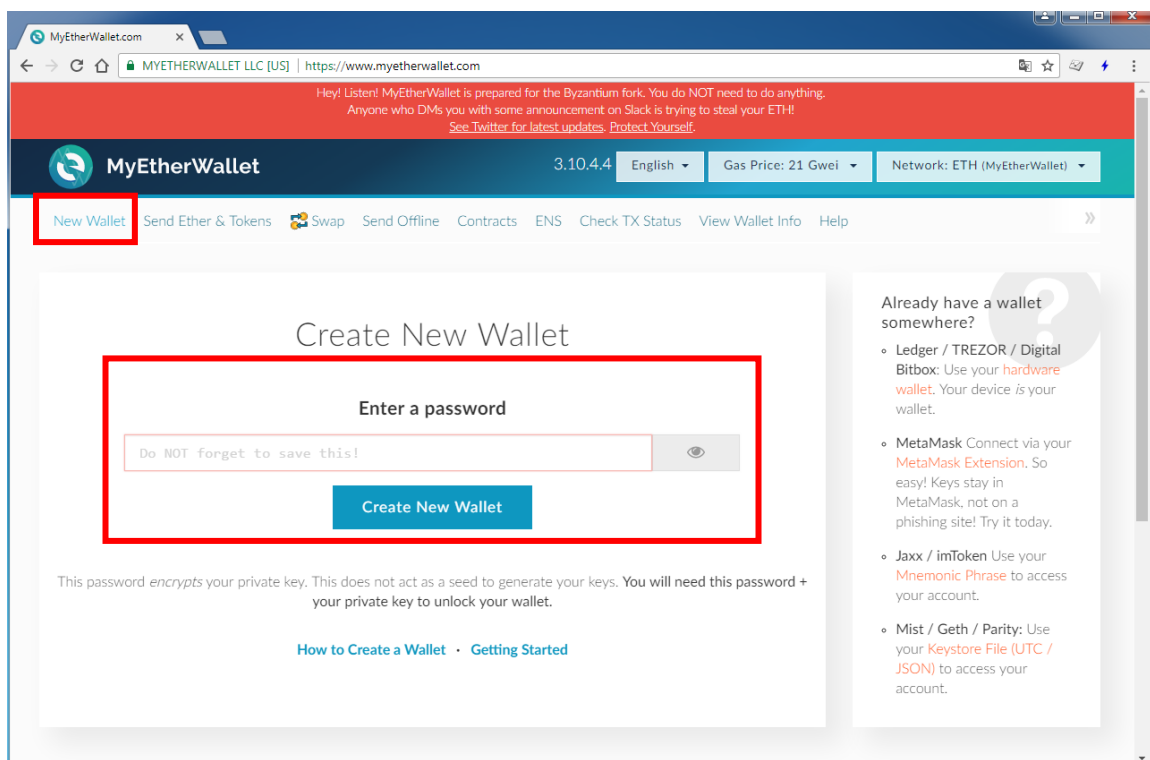

1.1.1 Go to the MyEtherWallet website

- Go to the MyEtherWallet website: <https://www.myetherwallet.com/>. Make sure that you access the website via an HTTPS protocol:

1.1.2 Enter a password

- On the "New Wallet" tab, enter the password that will be used to access your wallet (create a strong password using uppercase and lowercase letters, numbers and symbols).

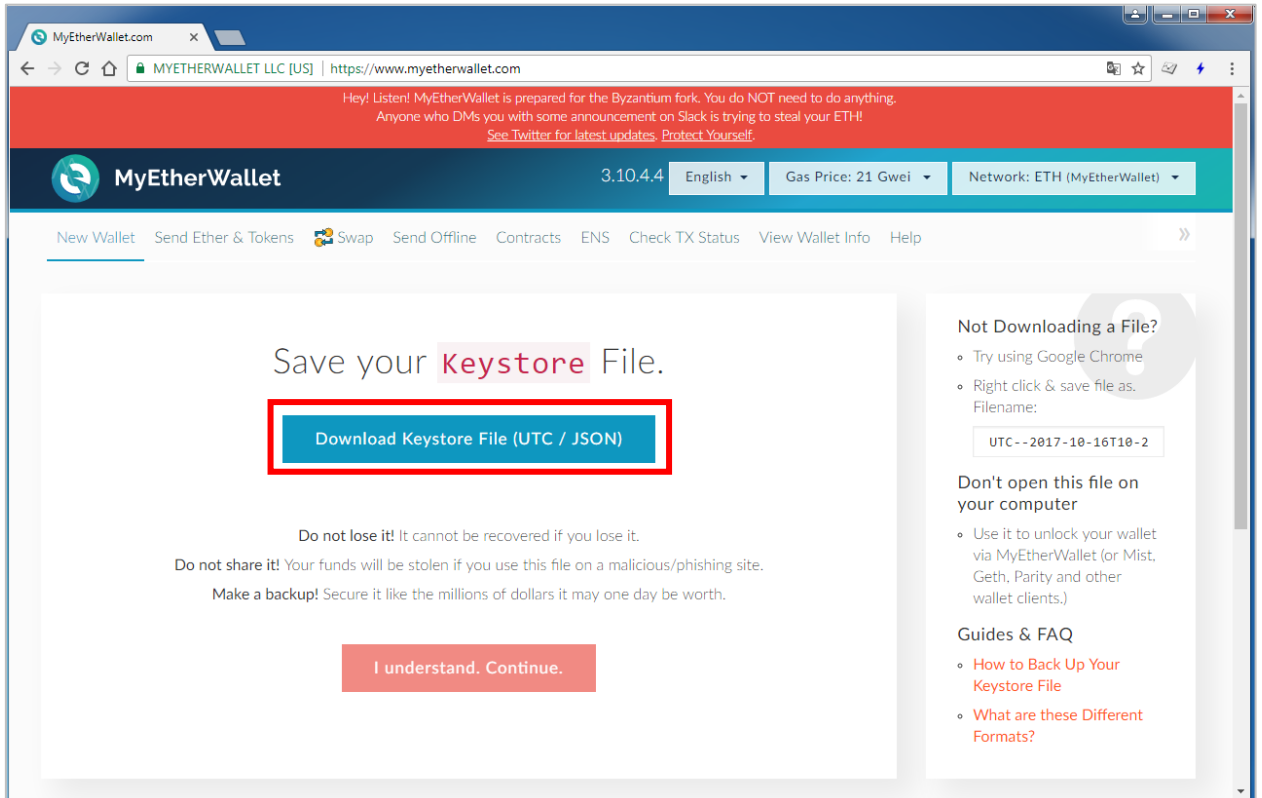

- Click on the “Create New Wallet” button.

Do not forget this password! If you lose your password, you will lose all ETH and PKT stored in your account.

1.1.3 Download Keystore file

- Click on the “Download Keystore File” button.
- The file will be downloaded to your computer.

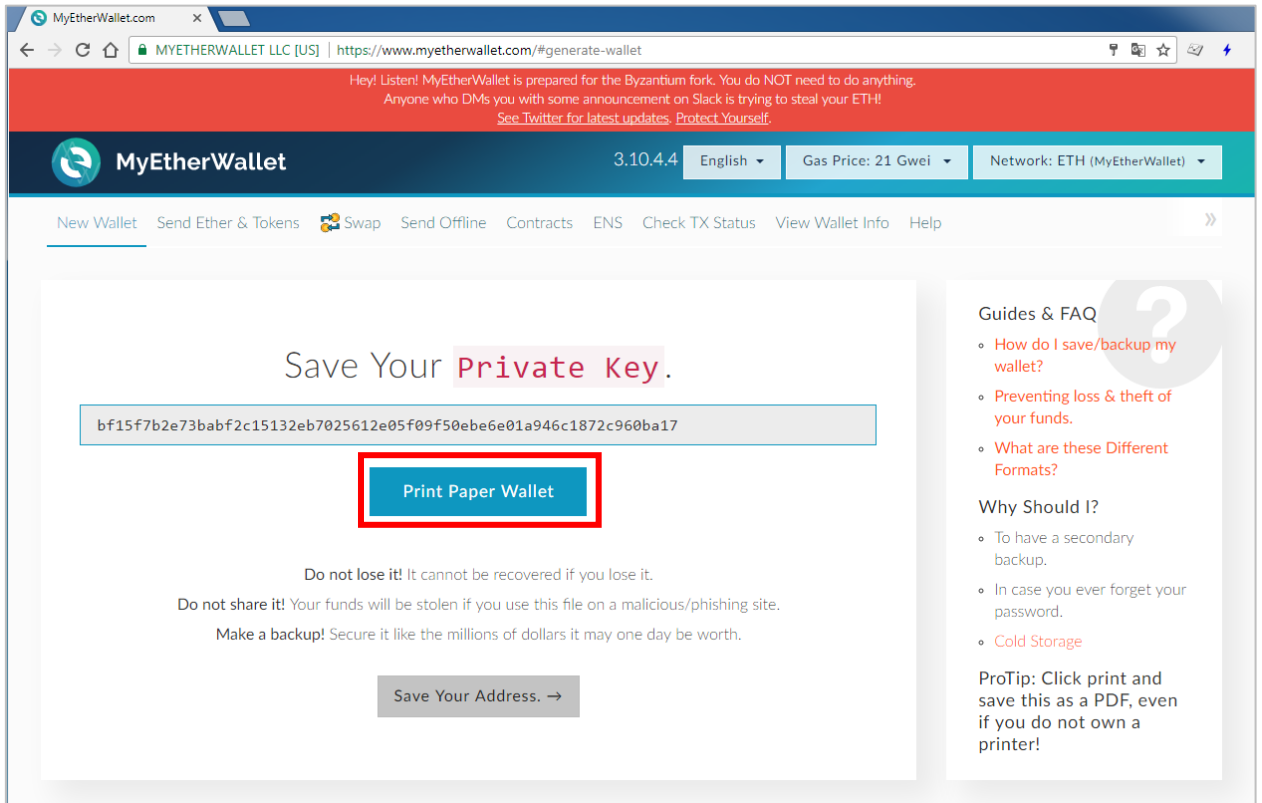

This is a digital signature file for your wallet. This file contains your private and public keys and is required every time you want to access your account.

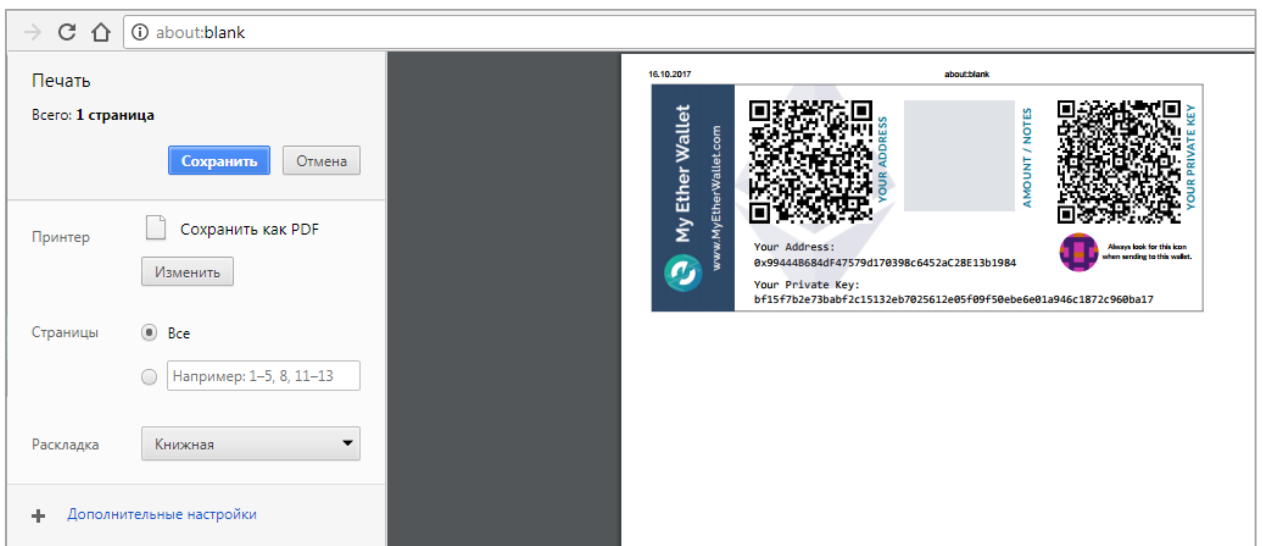

Please note that you won't be able to access your account without this file and the password from the previous step. If you lose one of them, you will lose all ETH and PKT stored in your account.

1.1.4 Backup your private key

- Click on the “I understand. Continue” button.
- Click on the “Print Paper Wallet” button.

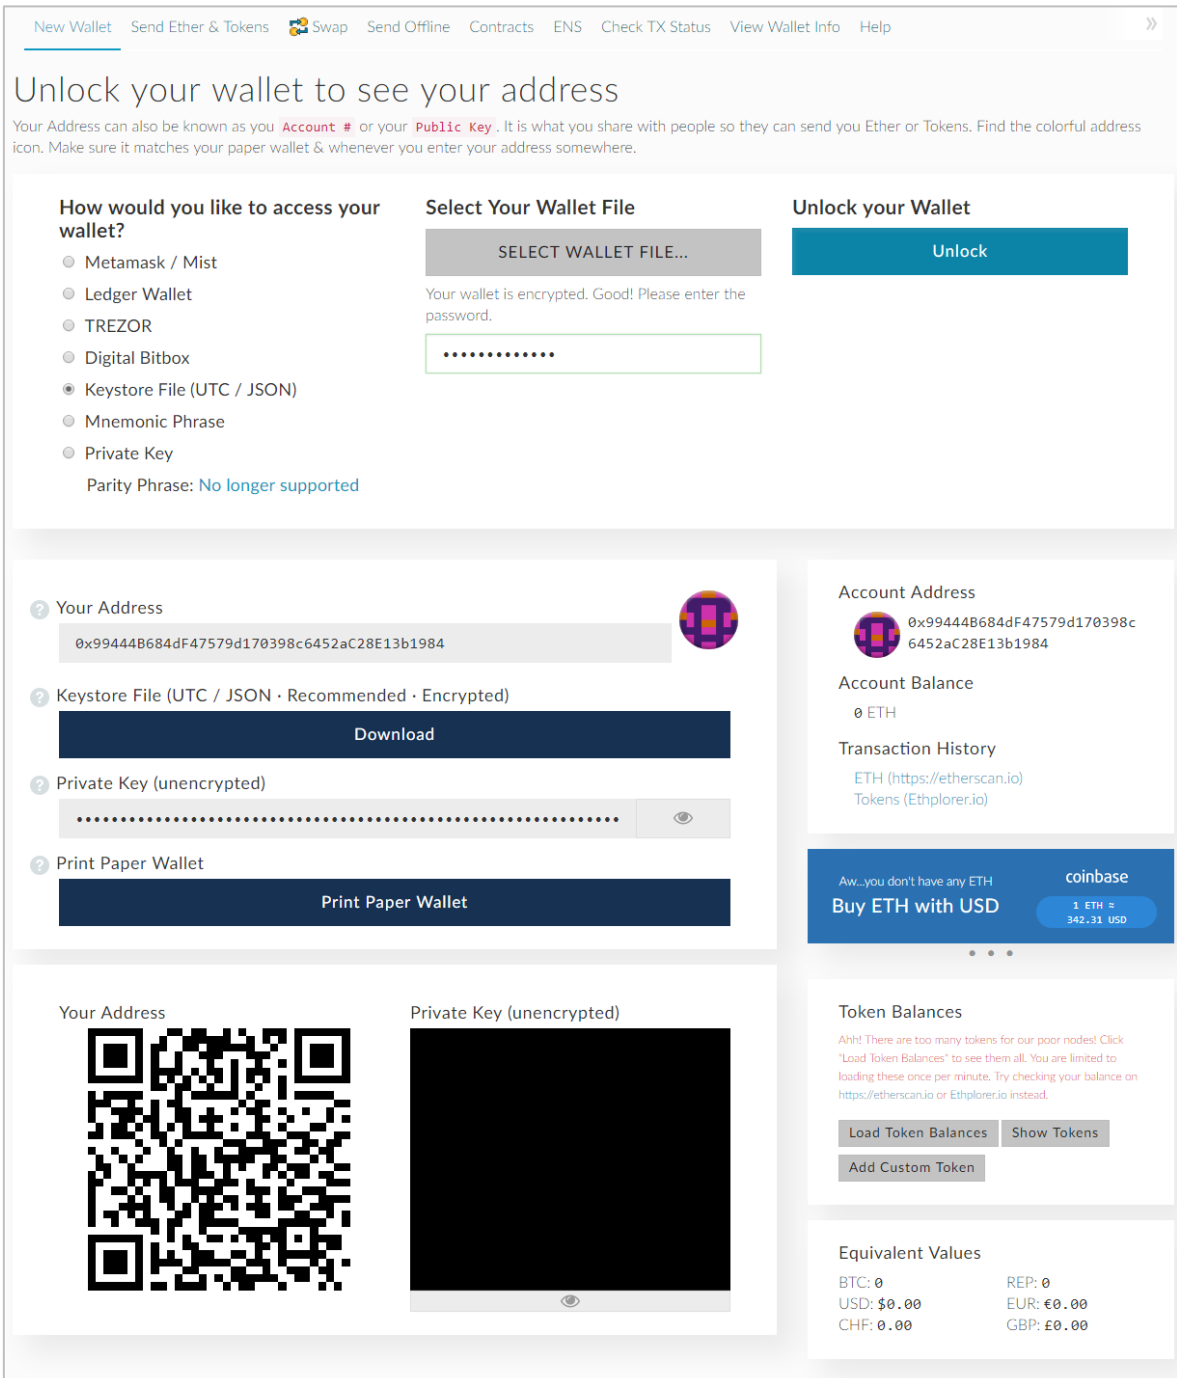

- Save or print the data file:

Do not share your private keys with anyone. The private key is an analog of the PIN code from your bank card. If anyone obtains your private key, they will have access to all of your funds.

1.1.5 Open your wallet to view the address

- Click on the “Save Your Address” button.
- Select the “Keystore File (UTC / JSON)” item.
- Click on the “SELECT WALLET FILE” button and select the keystore file downloaded in section 1.1.3.
- Enter the password.
- Click on the “Unlock” button.
- At the bottom you will see your wallet info:

New Wallet Send Ether & Tokens  Swap Send Offline Contracts ENS Check TX Status View Wallet Info Help

Unlock your wallet to see your address

Your Address can also be known as your **Account #** or your **Public Key**. It is what you share with people so they can send you Ether or Tokens. Find the colorful address icon. Make sure it matches your paper wallet & whenever you enter your address somewhere.

How would you like to access your wallet?

- Metamask / Mist
- Ledger Wallet
- TREZOR
- Digital Bitbox
- Keystore File (UTC / JSON)
- Mnemonic Phrase
- Private Key

Parity Phrase: [No longer supported](#)

1.2.4 Save your address

- Copy and save your address, which is in the "Your Address" and "Account Address" fields:

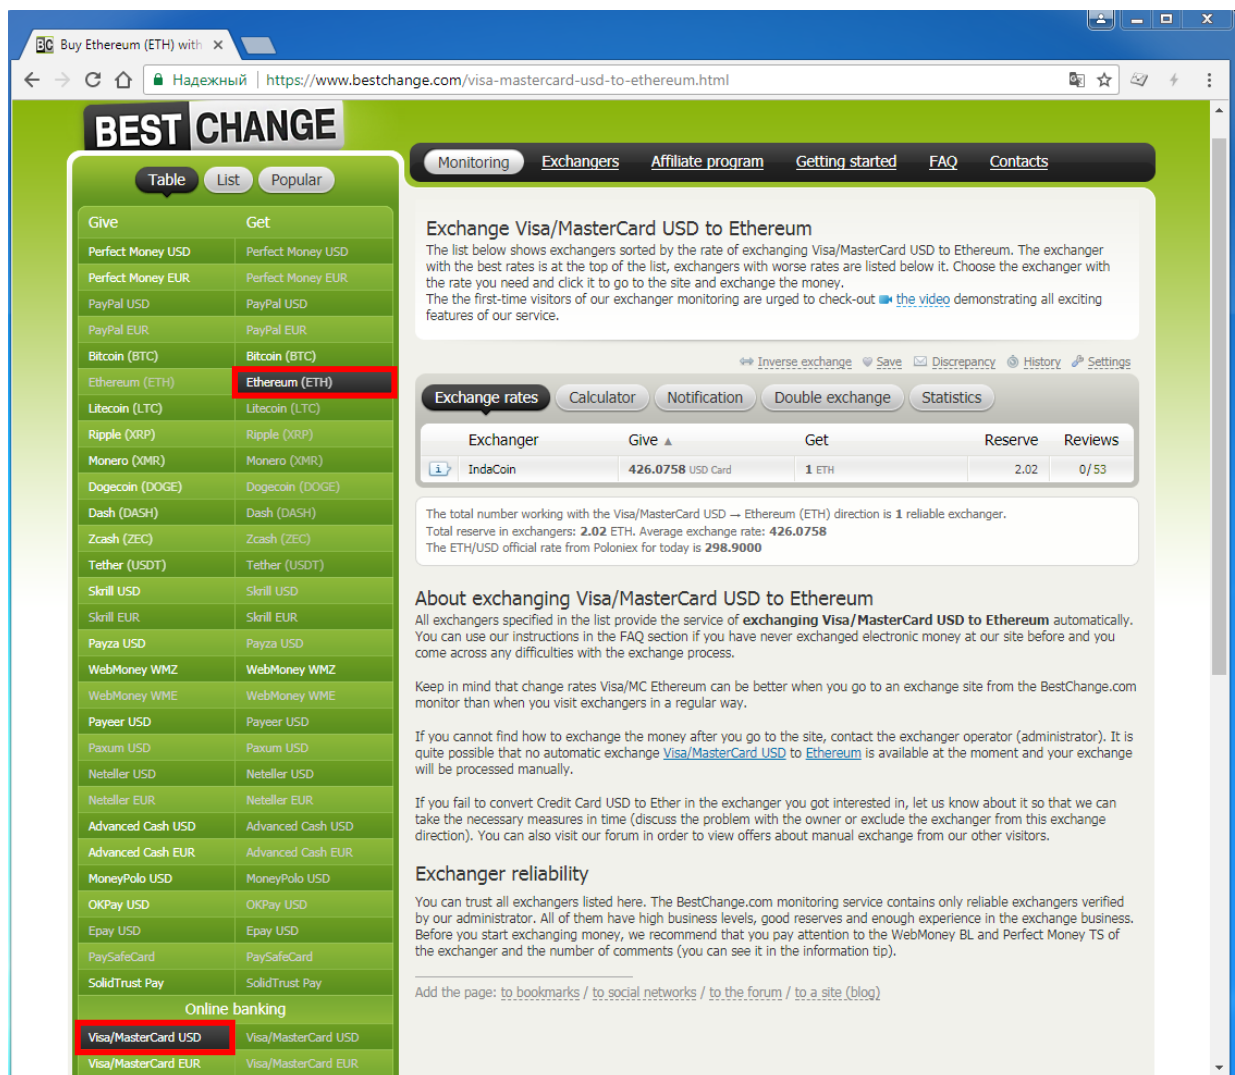

1.3. Buy ETH

Only the ETH cryptocurrency will be accepted on the PKT sale. You can buy ETH for any fiat currencies (e.g., USD, rubles, etc.) on any cryptoexchange (e.g., Coinbase.com, Kraken.com, poloniex.com, Cex.io). Also you can buy ETH for other cryptocurrencies (e.g., BTC, Dash, etc.) using exchange services.

The easiest way to buy ETH is to buy for USD using an exchange service (e.g., <https://xchange.cash>, <https://60cek.com/>, <http://lykke.com>, <https://localethereum.com/>, <https://www.bestchange.com>). Here is an example of using the BestChange service.

- Go to <https://www.bestchange.com>
- In the “Give” column select the payment method, e.g. “Visa/MasterCard USD”.
- In the “Get” column select “Ethereum (ETH)”.

The screenshot shows the BestChange website interface for buying Ethereum (ETH) with Visa/MasterCard USD. The page is titled "Buy Ethereum (ETH) with Visa/MasterCard USD" and includes a navigation menu with options like "Monitoring", "Exchangers", "Affiliate program", "Getting started", "FAQ", and "Contacts".

The main content area is divided into two columns: "Give" and "Get". The "Give" column lists various payment methods, with "Visa/MasterCard USD" highlighted in red. The "Get" column lists various cryptocurrencies, with "Ethereum (ETH)" highlighted in red.

Below the "Give" and "Get" columns, there is a table of exchangers. The table has columns for "Exchanger", "Give", "Get", "Reserve", and "Reviews". The first entry is "IndaCoin" with a "Give" of "426.0758 USD Card" and a "Get" of "1 ETH".

Below the table, there is a section titled "Exchange rates" with buttons for "Calculator", "Notification", "Double exchange", and "Statistics". The text below the table states: "The total number working with the Visa/MasterCard USD → Ethereum (ETH) direction is 1 reliable exchanger. Total reserve in exchangers: 2.02 ETH. Average exchange rate: 426.0758. The ETH/USD official rate from Poloniex for today is 298.9000".

There is also a section titled "About exchanging Visa/MasterCard USD to Ethereum" which provides instructions and information about the service. It mentions that all exchangers specified in the list provide the service of exchanging Visa/MasterCard USD to Ethereum automatically. It also includes a note about manual processing of exchanges and a section on "Exchanger reliability".

- Select the exchanger with the best rate and go to it.
- Follow the instructions of the selected exchanger and refill your ETH-wallet. **Please note that when you purchase PKT tokens, a small commission will be charged, so you should refill your wallet by a little more than you plan to invest in ICO.**

1.4. Send ETH to buy PKT tokens

Make sure that you have enough ETH in your wallet to make a transaction with a small fee for a transaction called "gas".

1.4.1 Go to <https://playkey.io> 30 minutes before the start of the PKT sale

The token sale will begin on November 1, 2017 at 08:00 GMT+3 and will end on November 30, 2017 at 23:59 GMT+3 or when the maximum sales level reaches 60,000,000 PKT.

Playkey token sale address -
0x26d08b9d227933a85e855656dc46ab889e183c88

If you send ETH before the sale starts (November 1, 2017 at 08:00 GMT+3), your transaction will be rejected.

The PKT sale will be carried out on the site <https://playkey.io> and also on the websites of our confirmed partners:

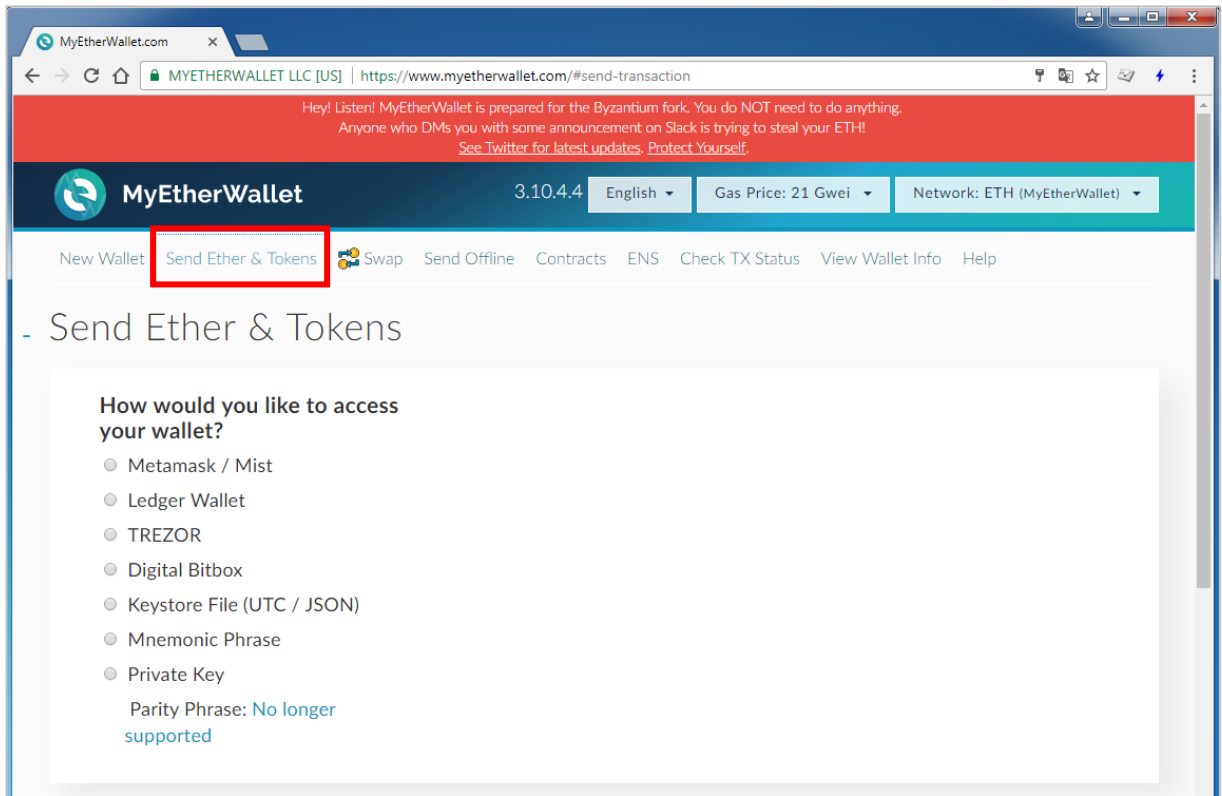

- <https://cryptonomos.com>
- <https://evercoin.com/pkt>
- <http://rowlingstone.com>

1.4.2 Go to the MyEtherWallet website

- Go to the MyEtherWallet website: <https://www.myetherwallet.com/>. Make sure that you access the website via an HTTPS protocol:

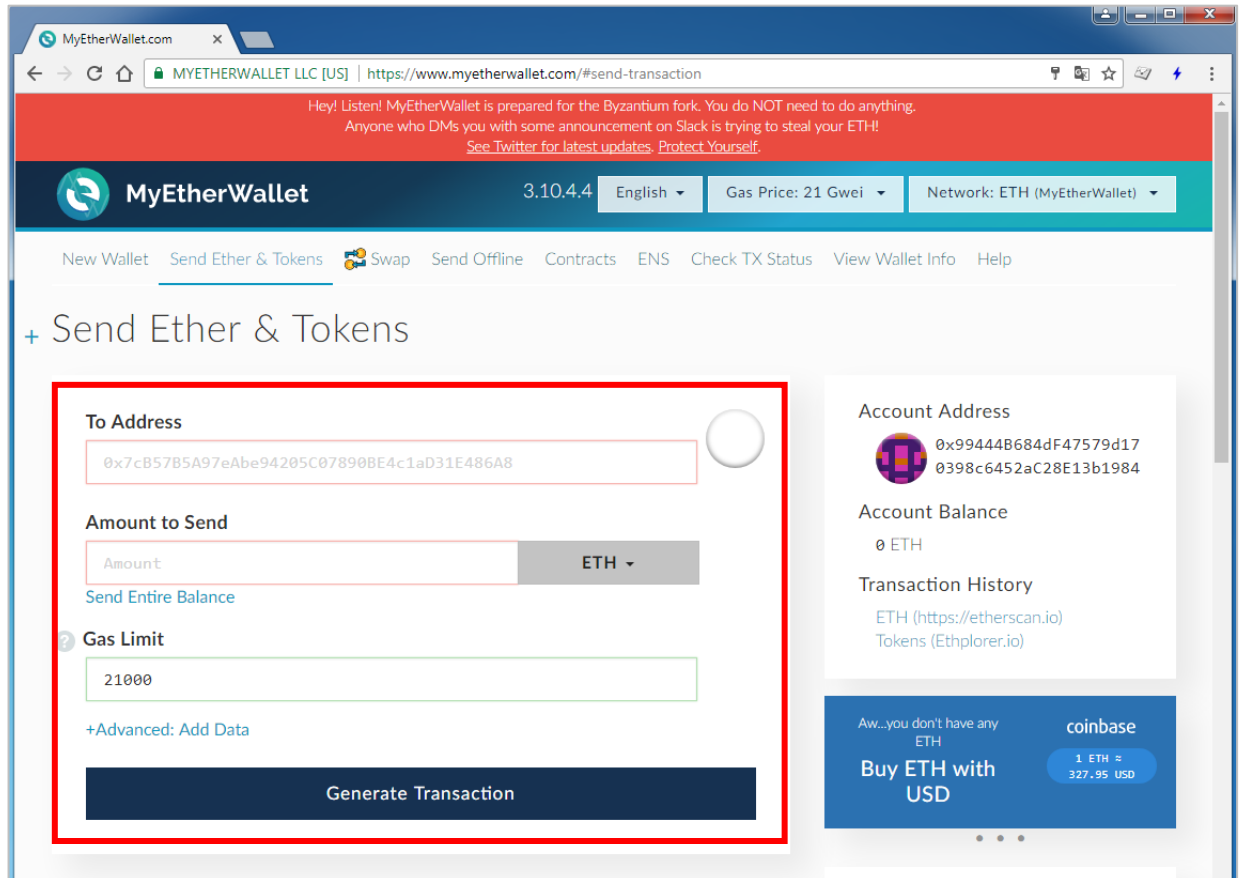

1.4.3 Go to the «Send Ether & Tokens» tab

1.4.4 Open your wallet

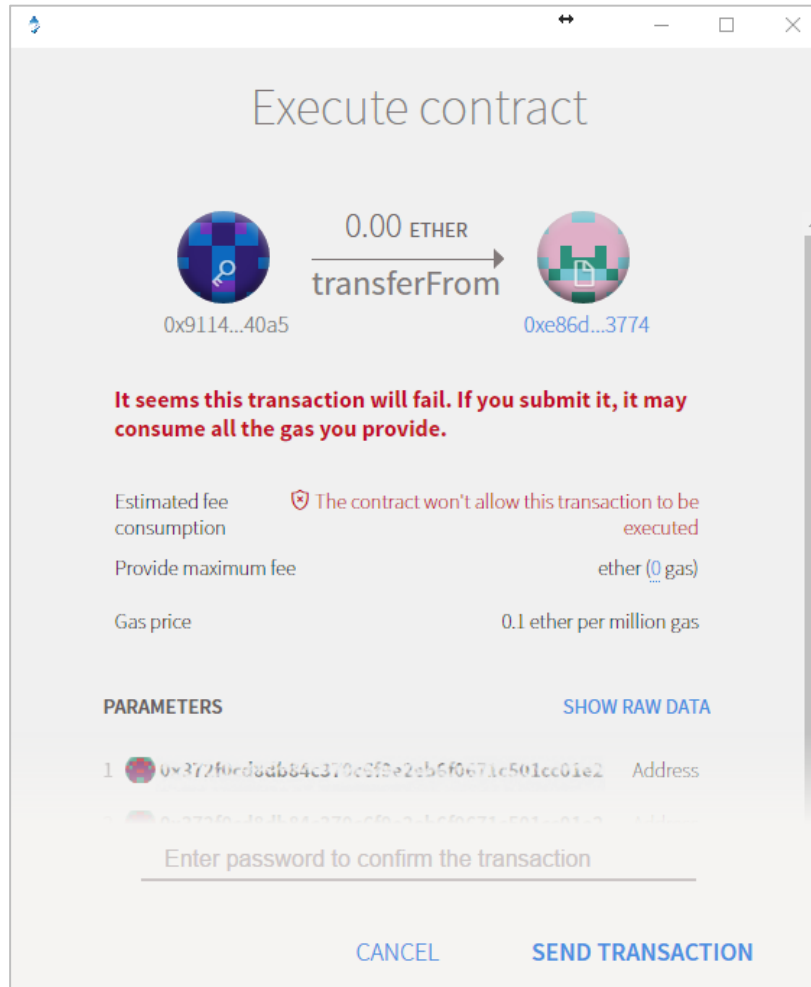

- Select the “Keystore File (UTC / JSON)” item.
- Click on the “SELECT WALLET FILE” button and select your keystore file.
- Enter the password.
- Click on the “Unlock” button.
- The ETH sending form will open:

1.4.5 Send ETH to the token sale address

- In the “To Address” field, paste the token sale address copied from the website <https://playkey.io> -
0x26d08b9d227933a85e855656dc46ab889e183c88
- In the “Amount to Send” field, fill in the amount of ETH you wish to use to buy PKT tokens.
- In the “Gas Limit” field, change the minimum amount to 200,000 gas. This will guarantee the processing of your transaction.
- Click on the “Generate Transaction” button.

If a warning appears that the transaction will fail, click on the "Cancel" button:

Check all transaction parameters and make sure that the required number of tokens is available for sale (<https://playkey.io> display this information). Then try again.

- If no warnings appear, click on the “Send Transaction” button.
- A pop-up appears in which you need to confirm the transaction. If the data is entered correctly, click on the «Yes, I am sure! Make transaction» button.

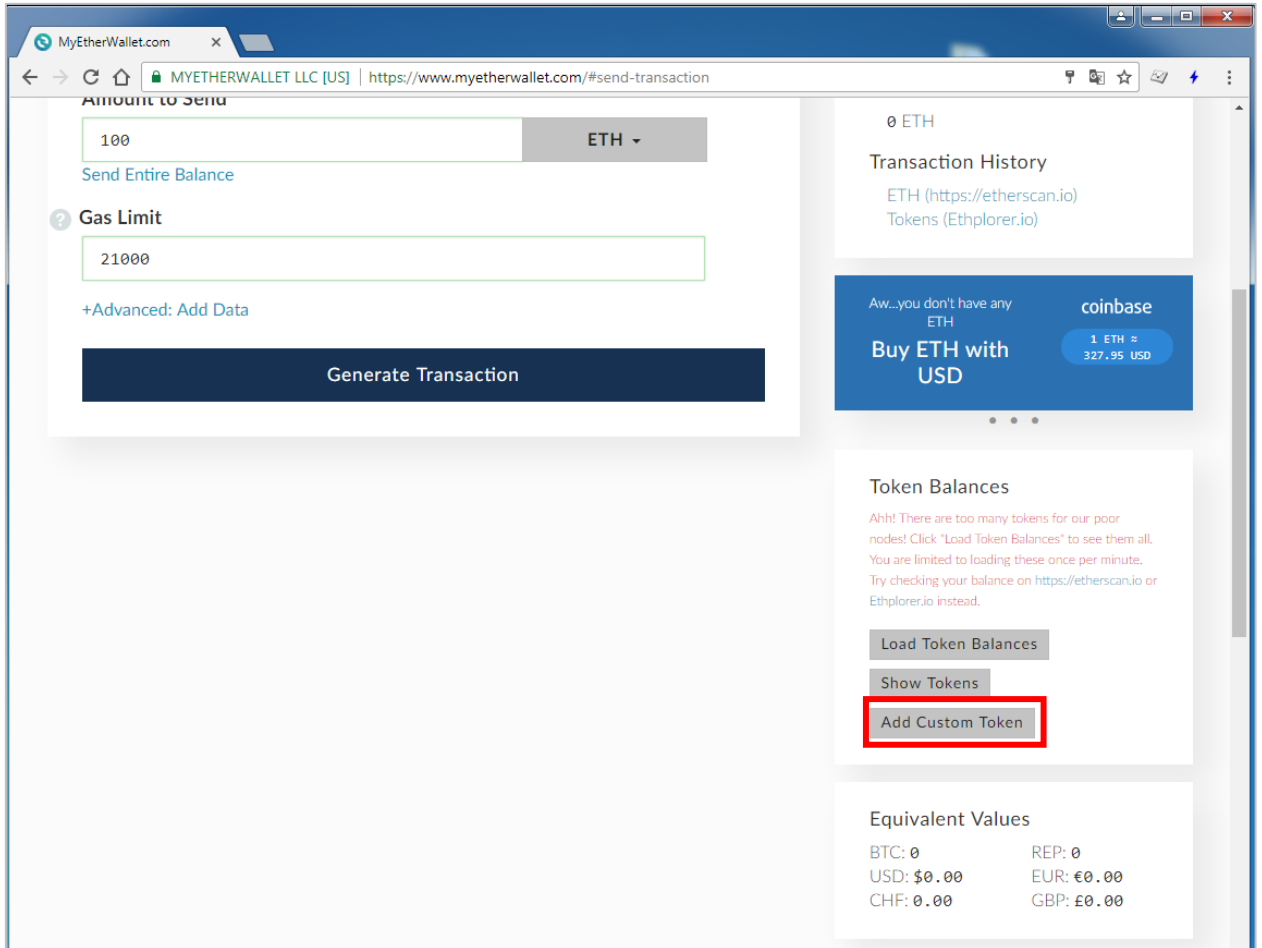

Do not click the button more than once!

Now you have purchased the amount of PKT that corresponds to the sent amount of ETH.

After sending the request, you receive a link to your transaction.

1.5. Add PKT tokens to the MyEtherWallet wallet

- Go to the «Send Ether & Tokens» tab.
- Open your wallet (see 1.4.4).
- In the “Token Balances” section click the “Add Custom Token” button.

- Enter the data in the fields:
 - Address – insert the contract tokens address Playkey: 0x2604fa406be957e542beb89e6754fcde6815e83f
 - Token Symbol – PKT
 - Decimals – 18

Token Balances

Ahh! There are too many tokens for our poor nodes! Click "Load Token Balances" to see them all. You are limited to loading these once per minute. Try checking your balance on <https://etherscan.io> or [Ethplorer.io](https://ethplorer.io) instead.

Address

Token Symbol

Decimals

- Click on the “Save” button.
- PKT tokens appear in the “Token Balances” section.

2. FAQ

2.1. Why can't I see the account I have just created in the blockchain explorer (e.g., Etherscan)?

Only active accounts are visible in a blockchain explorer. Once you transfer ETH to your account, it should become visible.

2.2. Why can't I see my balances when I open my wallet?

Most likely this is due to the firewall. In order to see the balance, you will need to use a blockchain explorer, for example, Etherscan.

2.3. I'm trying to unlock my wallet but it keeps hanging

Most likely this is due to decryption of Keystore-files.

In this case we recommend:

- Use the Google Chrome browser.
- Close other programs (e.g., a lot of browser tabs, etc.).
- Click "Continue" when a pop-up with an error indicating that the service is not responding appears.

2.4. Transaction Failed - "Out of Gas"

Service MyEtherWallet automatically estimates the amount of gas that is required to make a transaction, but sometimes this estimate is incorrect.

Try manually increasing the "Gas Limit". For example, try doubling the amount of gas that MyEtherWallet estimates, and sending again.

2.5. Another question

If you have any further questions, please contact us:
